Tokyo, Japan, April 12, 2017? Toyota Motor Corporation will launch a rental service for the Welwalk WW-1000 robot from the fall of 2017. The Welwalk WW-1000 is designed to aid in the rehabilitation of individuals with lower limb paralysis as a result of stroke and other causes.

The Welwalk WW-1000 comes with a range of rehabilitation support functions based on motor learning theory, including the ability to adjust the difficulty level to suit the patient, and to provide feedback about the patient's gait characteristics. The robot's simple construction and functions, such as easy fitting and central touch panel operation, ensure the ease of use in clinical settings.
