

Toyota Recalls Certain 2024 Toyota RAV4 and 2025 Lexus NX Vehicles

December 05, 2024

PLANO, Texas (Dec. 5, 2024) — Toyota is conducting a safety recall in North America involving certain Toyota RAV4 and Lexus NX vehicles produced in September 2024. Approximately 70 vehicles in the United States are involved in this recall.

Certain bolts may not have been properly tightened during manufacturing and can loosen over time, potentially causing the front brake calipers or front wheels to detach. If this occurs, there can be an increase in stopping distance or a loss of vehicle control, increasing the risk of crash.

For all involved vehicles, Toyota and Lexus dealers will ensure the front brake caliper mounting bracket and hub bearing bolts are tightened to the correct specification. If any components in the wheel area are damaged, they will be replaced. The remedy will be performed free of charge to owners.

Owners of involved vehicles will be notified by early February 2025.

Information about automotive recalls, including but not limited to the list of involved vehicles, is current as of today's filing date and is subject to change thereafter. To see if your vehicle is involved in a safety recall visit [Toyota.com/recall](https://toyota.com/recall), [Lexus.com/recall](https://lexus.com/recall), or nhtsa.gov/recalls and enter your Vehicle Identification Number (VIN) or license plate information.

For any additional questions, Toyota customer support is also available by calling the Toyota Brand Engagement Center (1-800-331-4331) for Toyota vehicles. Lexus customer support is also available by calling the Lexus Brand Engagement Center (1-800-225-3987) for Lexus vehicles.
